Estate & Home Access Control System

Your security is in your hands

Main gate

MK II – Multi-User System

Cellular network-based **multi-unit intercom system** that allows convenient screening of visitors at the entrance to residential or business properties before allowing access.

The **MKII intercom system** offers the user management and administration features to maximize the functionality that that GSM based intercom systems can offer.

It is exactly this mobile and globally based communication technology that positions the **MKII** at the frontier of intercom system technology.

Main Features Include

- Quick and easy installation, no wiring other than mains supply – operates via cellular network
- Uses new embedded SIM technology - does not need a SIM card (SIM chip is not compatible with all networks. Please enquire.)
- Cell phone or fixed line telephone doubles as an intercom handset and can receive calls from the gate station, and activate the entrance gate and up to two other access control devices
- Visitor can select from up to three contact numbers per unit to call
- Allows for visitor departure control (Free-exit facility)
- Convenient web-based interface for system updating and reporting
- Battery backup and built-in lightning protection
- Robust and durable entry panel
- CENTURION rolling code remote control integration and management[§]
- Time-based access control
- PIN code entry (two pre-programmed codes per unit)
- Programming can be done online* or manually at the unit
- Bulk SMS and email to complex residents
- Individual resident reporting for phone bills and gate openings
- Both successful and attempted-only gate openings are reported
- Unlimited, controlled access for residents
- Ability to communicate with security personnel at the gate
- Back-lit LCD display (double line)
- Weatherproof enclosure suitable for outdoor or indoor environments
- Online resident database administration
- Quick and reliable synchronization and firmware updating
- Both successful and attempted-only gate openings are recorded

CLAWS™

CLAWS - ROADWAY SPIKES FOR HIGH SECURITY ACCESS CONTROL
Give your traffic barrier **CLAWS** - an effective deterrent for **high-volume traffic control**.

Designed to provide a compelling reason for would-be criminals to reconsider their approach; **CLAWS** are constructed to take a beating but never miss a bit of their own.

CLAWS MAIN FEATURES

- Standard modular system ensures **good stock continuity**
- Modular construction allows components to be **transported and installed with ease**
- Adds **high security** to traffic barrier access controlled entrances and exits
- **Robust construction** built to withstand impacts from vehicles
- High-torque DC motor for **greater reliability and responsive operation**
- Selective High Security and Safety Modes
- Reliable **battery backup** ensuring continued service even when the lights go out
- Easy to maintain **saving you time and money**
- Traffic Yellow colored spikes for **high visibility and increased safety**
- Four different configurations to ensure a model for just about any application
- All moving parts are removable for **easy maintenance**
- External limit switches provide a **failsafe operation**
- Indirect Drive models can operate independently of traffic barrier units
- All-weather construction
- Easy to change orientation depending on traffic flow requirements
- Supports output for robot interface
- Variable models and adjustable speed of operation to suit the requirements of just about any installation¹
- Can be mounted in any position, even away from the traffic barrier¹
- **CLAWS'** spikes can move independently of the **SECTOR** - such as lower before the barrier raises, and raised only once the barrier has lowered¹
- Uses standard **SECTOR** controller and gearbox allowing for **reduced spare inventory**

AT YOUR HOME GATE

POWERED BY

SWING GATES OR BUTTERFLY

SLIDING GATES

VECTOR – SWING GATES

- **VECTOR2 - DOMESTIC AND LIGHT-INDUSTRIAL LINEAR SWING GATE MOTORS**
- For **domestic and light industrial swing gate applications** - the **VECTOR2 linear swing gate system** with battery backup offers a **quick and easy** (not to mention good looking) installation. It is an exceptionally strong set of operators for gates up to 4m wide, per leaf.
- The low profile shape of the **VECTOR2** linear swing gate motor enhances its aesthetic appeal and allows it to blend in unobtrusively with the design of the gate. With full position control the system provides pinpoint stopping of the gate in the open and closed positions without the need for mechanical end stops. Added to this its **sophisticated speed control circuit** smoothly operates the gate with **reduced shock, reduced loading, and extended reliability**.
- Setup of the system using the **VECTOR2** controller with an **intuitive, easy-to-use LCD interface**, is absolute child's play. Choosing from a wide range of features, the **VECTOR2** system can be adapted to suit almost any application.

SLIDING GATE

The lightning-fast **CENTURION D10 Turbo industrial sliding gate motor** is the perfect solution for speed freaks to get their fix. Whether you're just in a hurry, or seriously concerned about your security, there is no time wasted with the D10 Turbo at your gate. This beast will move a gate weighing up to 1000kg and, depending on the weight of the gate, can reach speeds of **up to 50 meters per minute**. It's our fastest operator yet!

Accessories

G-SWITCH-22 GSM Module

MONITORING AND SWITCHING DEVICE

The **CENTURION G-SWITCH-22 GSM module** gives you complete control at your fingertips. With the ability to switch devices on and off and be sent SMS alerts - **all via your phone** - the **G-SWITCH-22** lets you look after your home or business from just about anywhere.

Monitoring and alerting

The **G-SWITCH-22 GSM system** looks after your property when you're not around. It can be configured to monitor **two separate electrical devices**. It will send you an SMS letting you know if your alarm is on or off or your reservoir is full or empty.

Control

Forgot to switch on the alarm before you left home? Don't turn the car around...Control your home - from your phone. Simply call the **G-SWITCH-22** (free of charge) or send it an SMS. You can turn a seemingly endless list of electrical devices on and off just by using your cell phone

G – SPEAR GSM INTERCOM

DOMESTIC &
ADVANCED GSM-BASED
INTERCOM

G-SPEAK CLASSIC+ - ADVANCED GSM-BASED INTERCOM SYSTEM

The **G-SPEAK GSM-based intercom system** is ideal for people on the move. Utilizing your mobile phone as a handset you can answer your intercom, and open your gate, from just about anywhere. Lengthy, expensive cable runs are a thing of the past.

The **G-SPEAK Classic+ advanced GSM-based intercom system** offers the amazing **freedom, security and convenience** of being able to answer your intercom from anywhere in the world, and also includes advanced functionality such as the high-security **Eavesdropping** feature and input monitoring.

KEY FEATURES

- The **G-SPEAK Classic+** system includes two high-security features:
 - **Listen Mode** – mutes the microphone at the Calling Module so that you can listen inconspicuously for or any activity at your gate
 - **Talk Mode** – use this feature to scare away loiterers at the gate
- **Receive SMS notifications* on your phone of:**
 - Gate left open
 - Infrared safety beams obstructed
 - Alarm activated
 - Mains failed
- **Control* up to four different electrical devices via a missed call (free) or SMS:**
 - Open your gate from anywhere in the world
 - Switch a pool pump on and off
 - Control a geyser or generator
 - Activate irrigation systems
 - Switch on lights
 - Arm an alarm

POLO PHONE/VIEW

POLOview - SURVEILLANCE INTERCOM SYSTEM

The POLOview surveillance system links the simplicity of an audio intercom with the power and flexibility of color CCTV. It is designed to provide the ability to communicate with visitors at one's entrance while at the same time survey the surroundings and other security risk areas for unwanted visitors.

Main features

- Connect up to four weatherproof color cameras
- Cameras equipped with infrared night vision
- Timed and manual switching between cameras
- Latch to view one camera only
- Modern, seven inch color LCD flat monitor (*with ability to add extra monitor or interface with TV*)
- Audio communication via POLOphone intercom
- Full battery backup of POLOview system

Support & Services

- Local technician within the state - provides quick turn around minimizing down time
- Free service for the first 6 months
- 12 months warrantee on all products
- Parts available locally
